What Sets Our Booths Apart

Custom Microsite

The microsite feature offers an online gallery where all event photos, GIFs, and videos are collected for easy viewing, sharing, and downloading. Guests can access it via a link, view all images in one place, and instantly share or download photos. The microsite can be customized with event colors, logos, and branding. It can also be public or private based on privacy needs. After the event, guests can revisit the microsite, keeping the excitement alive and enhancing engagement with the host or brand.

Gallery Mode

In gallery mode, photos taken during the event are saved in a virtual gallery accessed through our back screen. Unlike slideshow mode, where photos are displayed sequentially, gallery mode gives guests the option to view, share, or reprint selected photos.

Slideshow Mode

In slideshow mode, images are displayed on the back screen in real-time creating an ongoing slideshow of all the photos taken during the event. As guests take photos in the booth, each image is added to the slideshow, allowing everyone at the event to view recent photos without having to interact with the booth software.
